

# Free Love

I rock and she rolls, her hands are cold  
The wind is blowing Go Go Go Go Tiger  
And like Shaolin, we're safe in our skin  
We twist and bend and dodge as we spin it

Give me your flesh, take my bone and leave me alone  
Give me your honey, take my juice and keep the blues

I want freedom, I want danger, games and sin  
I don't need you to breastfeed and tuck me in  
I want freedom  
Freedom

Our colors will fade, we'll crumble like clay  
Why bother playing this masquerade, babe  
We'll burn like black gold, like alcohol  
Why not keep it

## ROCK N ROLL HONEY

Give me your flesh, take my bone and leave me alone  
Give me your honey, take my juice and keep the blues

I want freedom, I want danger, games and sin  
I don't need you to breastfeed and tuck me in  
I want freedom  
Freedom

You're so cool and so cold  
So immune to control  
You're confused and deranged  
Disillusioned, blunt and lame

Love, I need love, plain and steep, ocean high and mountain deep  
I need love, so profound, it cements me to the ground  
I need love, you and me, Two make One Eternity
